

GAMING

Legalizing sports gaming in MA is not a slam dunk, a low slow curve, or just an extra point. No surprise, where are the casino's? After all, who in vote rich suburbia really wants their child to graduate and become a dealer? Hell, they don't even want it for someone else's kid.

However, there is some room for the pro gaming forces as the Democrats seem unsure if its good, revenue, or bad, regressive. As for fantasy on line sports gaming 27% are already there, mostly Millennials, but they may not be big enough to get it on anyone's agenda, until the recession.
